A4AI Ghana Coalition
Synergies and Refinements

Working Group
November 11, 2014
Infrastructure Sharing and Open Access

- Ensure Convergence in Infrastructure Sharing and Open Access
- Importance and potential of community networks reflected into the paper linked to open access rationale
- Look at Stockholm and Lagos City Model
- Consider cross border interconnections and costs involved
- Consider Ghana context and positive or negative aspects of mandating infrastructure sharing
- Consider the changing tower ownership and management models – what does the reality on the ground say about shape of any recommendation for sharing
- Consider how expiration of guidelines and decommissioning process impacts on recommendations
- Take account of frequency and network configurations – Governments generally don’t.
Taxation

- Use of reports and examples in global advocacy
- Gather data from GCNet
- Explore opportunities with Dr. Dufour, Institute of fiscal policy
- Ministry of Trade and Industry and OEM
- Networks of Communications Reporters used by all groups
- Consumer Group Synergies – Goski Alabi et al
- A4AI highlight Ghana challenges at global level African Union Ministerial Summit
- Using national and global studies/data to highlight the benefits of no tax.
Data

• Questions about working group collecting

• Focus on who is collecting what, what is being collected, how and when.

• Focus standardizing definitions, methodology and forms of analysis (Improve institutional linkages between, MoC, NCA, GSS, GODI and NITA!!!!)
