

**A4AI-Nigeria Coalition Meeting
Nicon Luxury Hotel
Abuja, Nigeria**

Wednesday, 25 January 2017

The Alliance for Affordable Internet (A4AI) brings together prominent players from government, the private sector, civil society and development sectors to provide a unified voice and coordinated focus in addressing the shared goal of open, affordable and equal access to the Internet in the developing world. A4AI aims to make the Internet universally affordable for all who want to use it.

Since 2014, A4AI-Nigeria has been working on four priority issues that must be addressed to unlock the potential for affordable, universal and equal access in Nigeria:

- Infrastructure Sharing and Open Access – limited sharing of some infrastructure.
- Spectrum - concerns over spectrum policy, including innovative and efficient use of spectrum.
- Consumer Awareness and Pricing Transparency – limited consumer awareness and information about the benefits and cost of Internet services.

This coalition meeting will focus on reviewing the progress made by the Coalition over the past two years, challenges faced, lessons learned and next steps to update the Coalition's focus areas and workplans for the next three-year period.
